

1. Draw a picture of a cell including and labelling: nucleus, golgi bodies, endoplasmic reticulum, cell membrane, mitochondrion and cytoplasm

2. Where are the chromosomes?

3. What is the plural of 'mitochondrion' and why is it so strange?

4. What is the function of the cell wall?

5. What is the function of chloroplasts?

6. Say if the following belong to the animal cell (AC), to the plant cell (PC), or both (B)

- Cytoplasm

- Chloroplasts

- Cell wall

- Endoplasmic Reticulum

- Ribosomes

- Golgi bodies

- Lysosomes

- One large vacuole

- Small vacuoles

- Nucleus
